

Marine Security Solution

Marine Security at its best with the new class of patrol boats from PT Shields Security Solutions with a long range of functionality and specifications for different needs.

This 7.5 meter patrol boat is built to military and CE standards, specially designed to multi-functionality with functions like:

- Patrolling - cruising at 20 knots equipped with radar and VHF radio
- Interception and Interdiction – Max speed at 30 knots with boarding ability
- Diving – GPS locator and plenty of room for equipment
- Search and Rescue – Stability in high sea, ability to pull as well as pumping water from leaking ships
- Ambulance – Can be equipped with bed and medical equipment for fast medical transportation
- Value transport – With armed guard it can be configured for transport of cash and other high value cargos
- Fire Extinguishing – With a water cannon installed it can be used for coastal approach at forest fires, harbor accidents and on burning ships at sea
- Personnel Transport – With advantage it can be used to move security personnel around islands or coastal areas
- Armed – Crew and/or boat can be armed depending on local regulation

Each of the functionalities has specially trained staff depending on your needs. It can operate 24 hours a day 7 days a week. Can under normal circumstances work 12 hours without refueling. In our total solution a full equipped base station with spare parts can be provided, even in remote areas to ensure efficient and continuous usage of equipment and crew.

Captain of each boat is certified and will be trained in the geography of the assigned area. His deputy is a mechanic with knowledge and training in all the functions of the boat. Twin engines ensure reliability at sea. WMAX communication solutions are available in patrol areas if needed which makes on board cctv and warning systems possible for patrolling of larger areas.

Coordination with navy, coast guard and local police force is included if required. Basic licensing under the police, but additional coordination is always made depending on local conditions.
